

The globally trusted solution
for injection in all species

Ovijector 2ml shown with Multifit attachment

For use with all oil and water-based injectables

Truly Ergonomic

Our unique four-finger trigger and balanced design spreads workload across the whole hand.

- ~ Reduced strain-related injuries
- ~ Lower operator fatigue
- ~ Sessions are more efficient

Durable

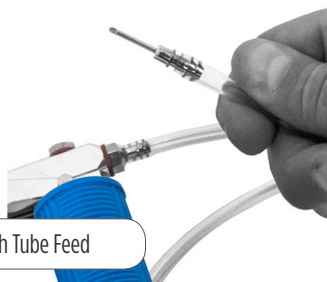

Our robust syringes are built with chrome-plated brass to a British standard.

- ~ Long life
- ~ Resists corrosion
- ~ Suited for use in all conditions

All of our syringes are digitally calibrated for accurate dosing

Options for different vaccine supply types

with Tube Feed

All our syringe models are tube-feed as standard, and come with a basic feed needle and length of PVC tubing

with Multifit Attachment

The Multifit attachment allows reliable direct connection of standard medicine bottles

with Cap Assembly

Cap Assembly allows user to prepare dry vaccine or decant from a larger supply

Range of Accessories

Spares Kits available for all our syringes

Fishguard needle guide aids correct injection in fish

Variety of long delivery stems maintain distance between user and animal

Multifit Glass Bottle Holder

Magnetic Counter attachment accurately counts number of doses
